yearly
 monthly

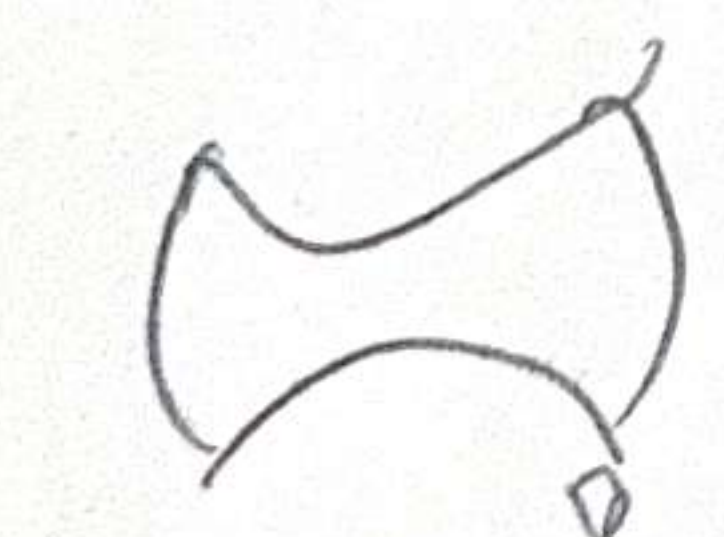

Scatter plot can use filter for cuisines to visualize easier. Size can represent cost.

Cuisine:

Categories from diverging chart can be implemented in stacked bar instead.

Combine and Refine

Location:
 Zoom: 1x

Map can have location dropdown and zoom bar.

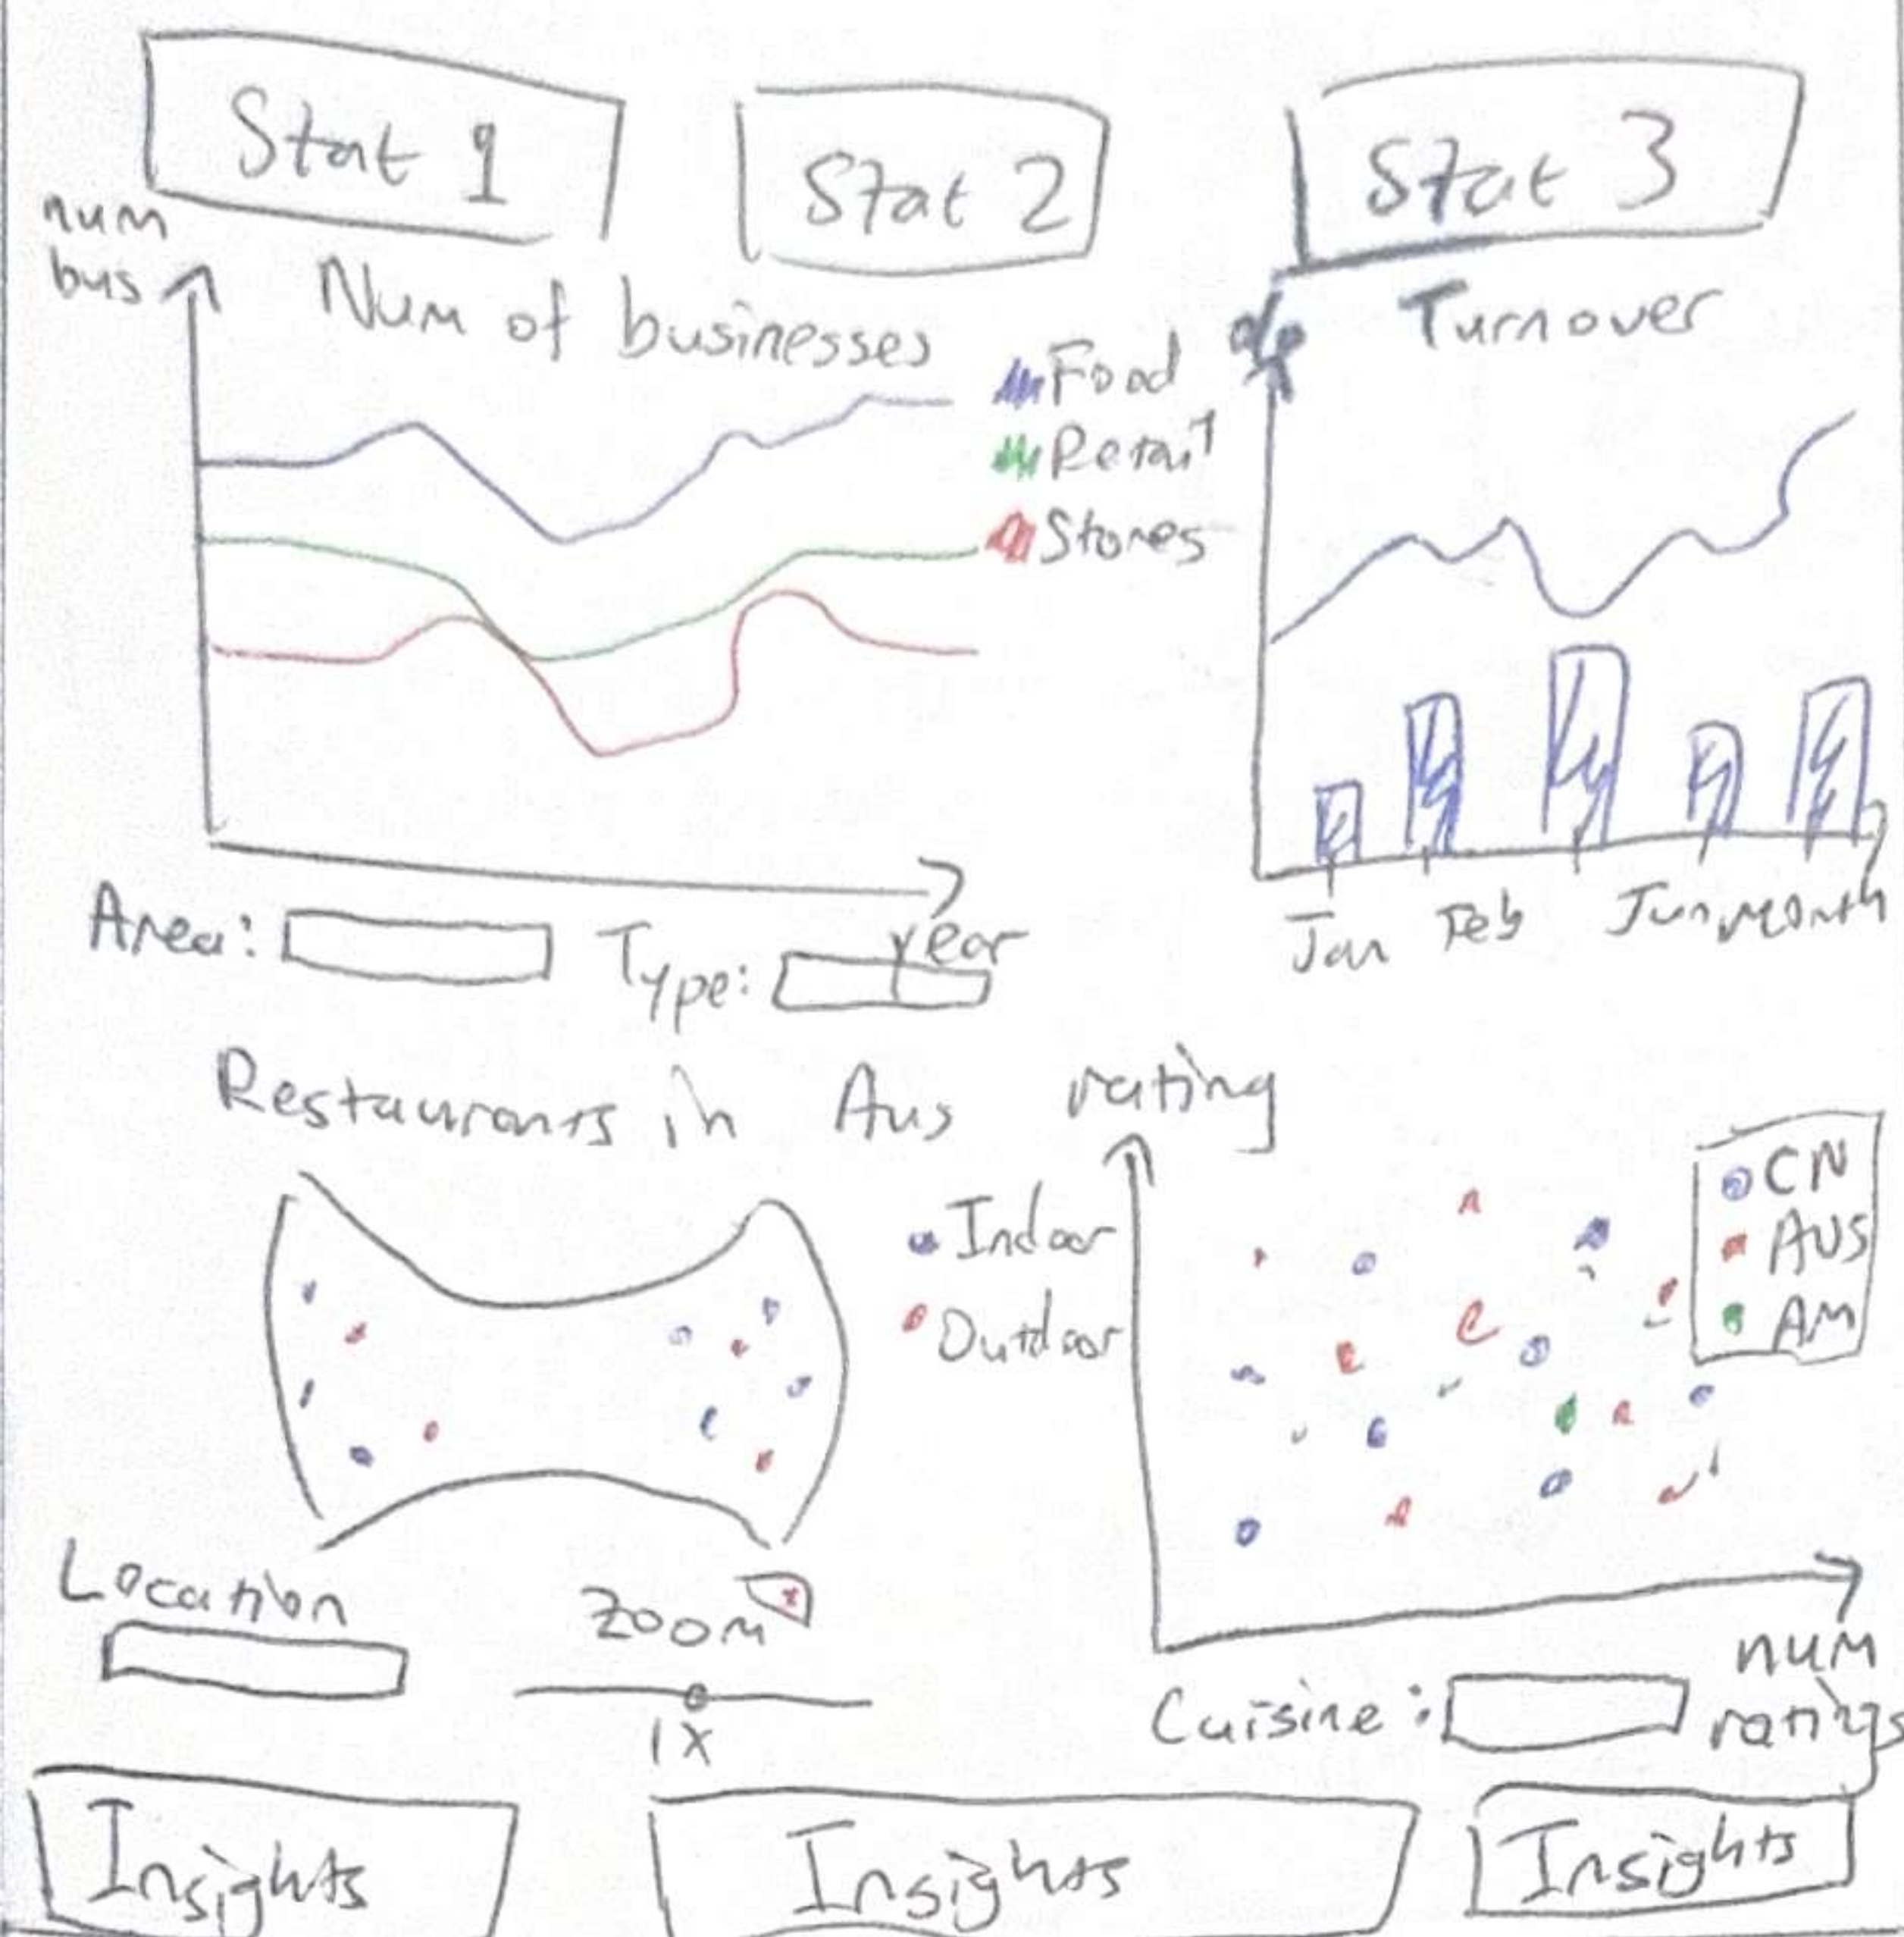

Map could also just be Melbourne depending on data.

Summarize and Question.

- Not many charts share attributes so may be hard to use global filters.

Big Picture / Layout

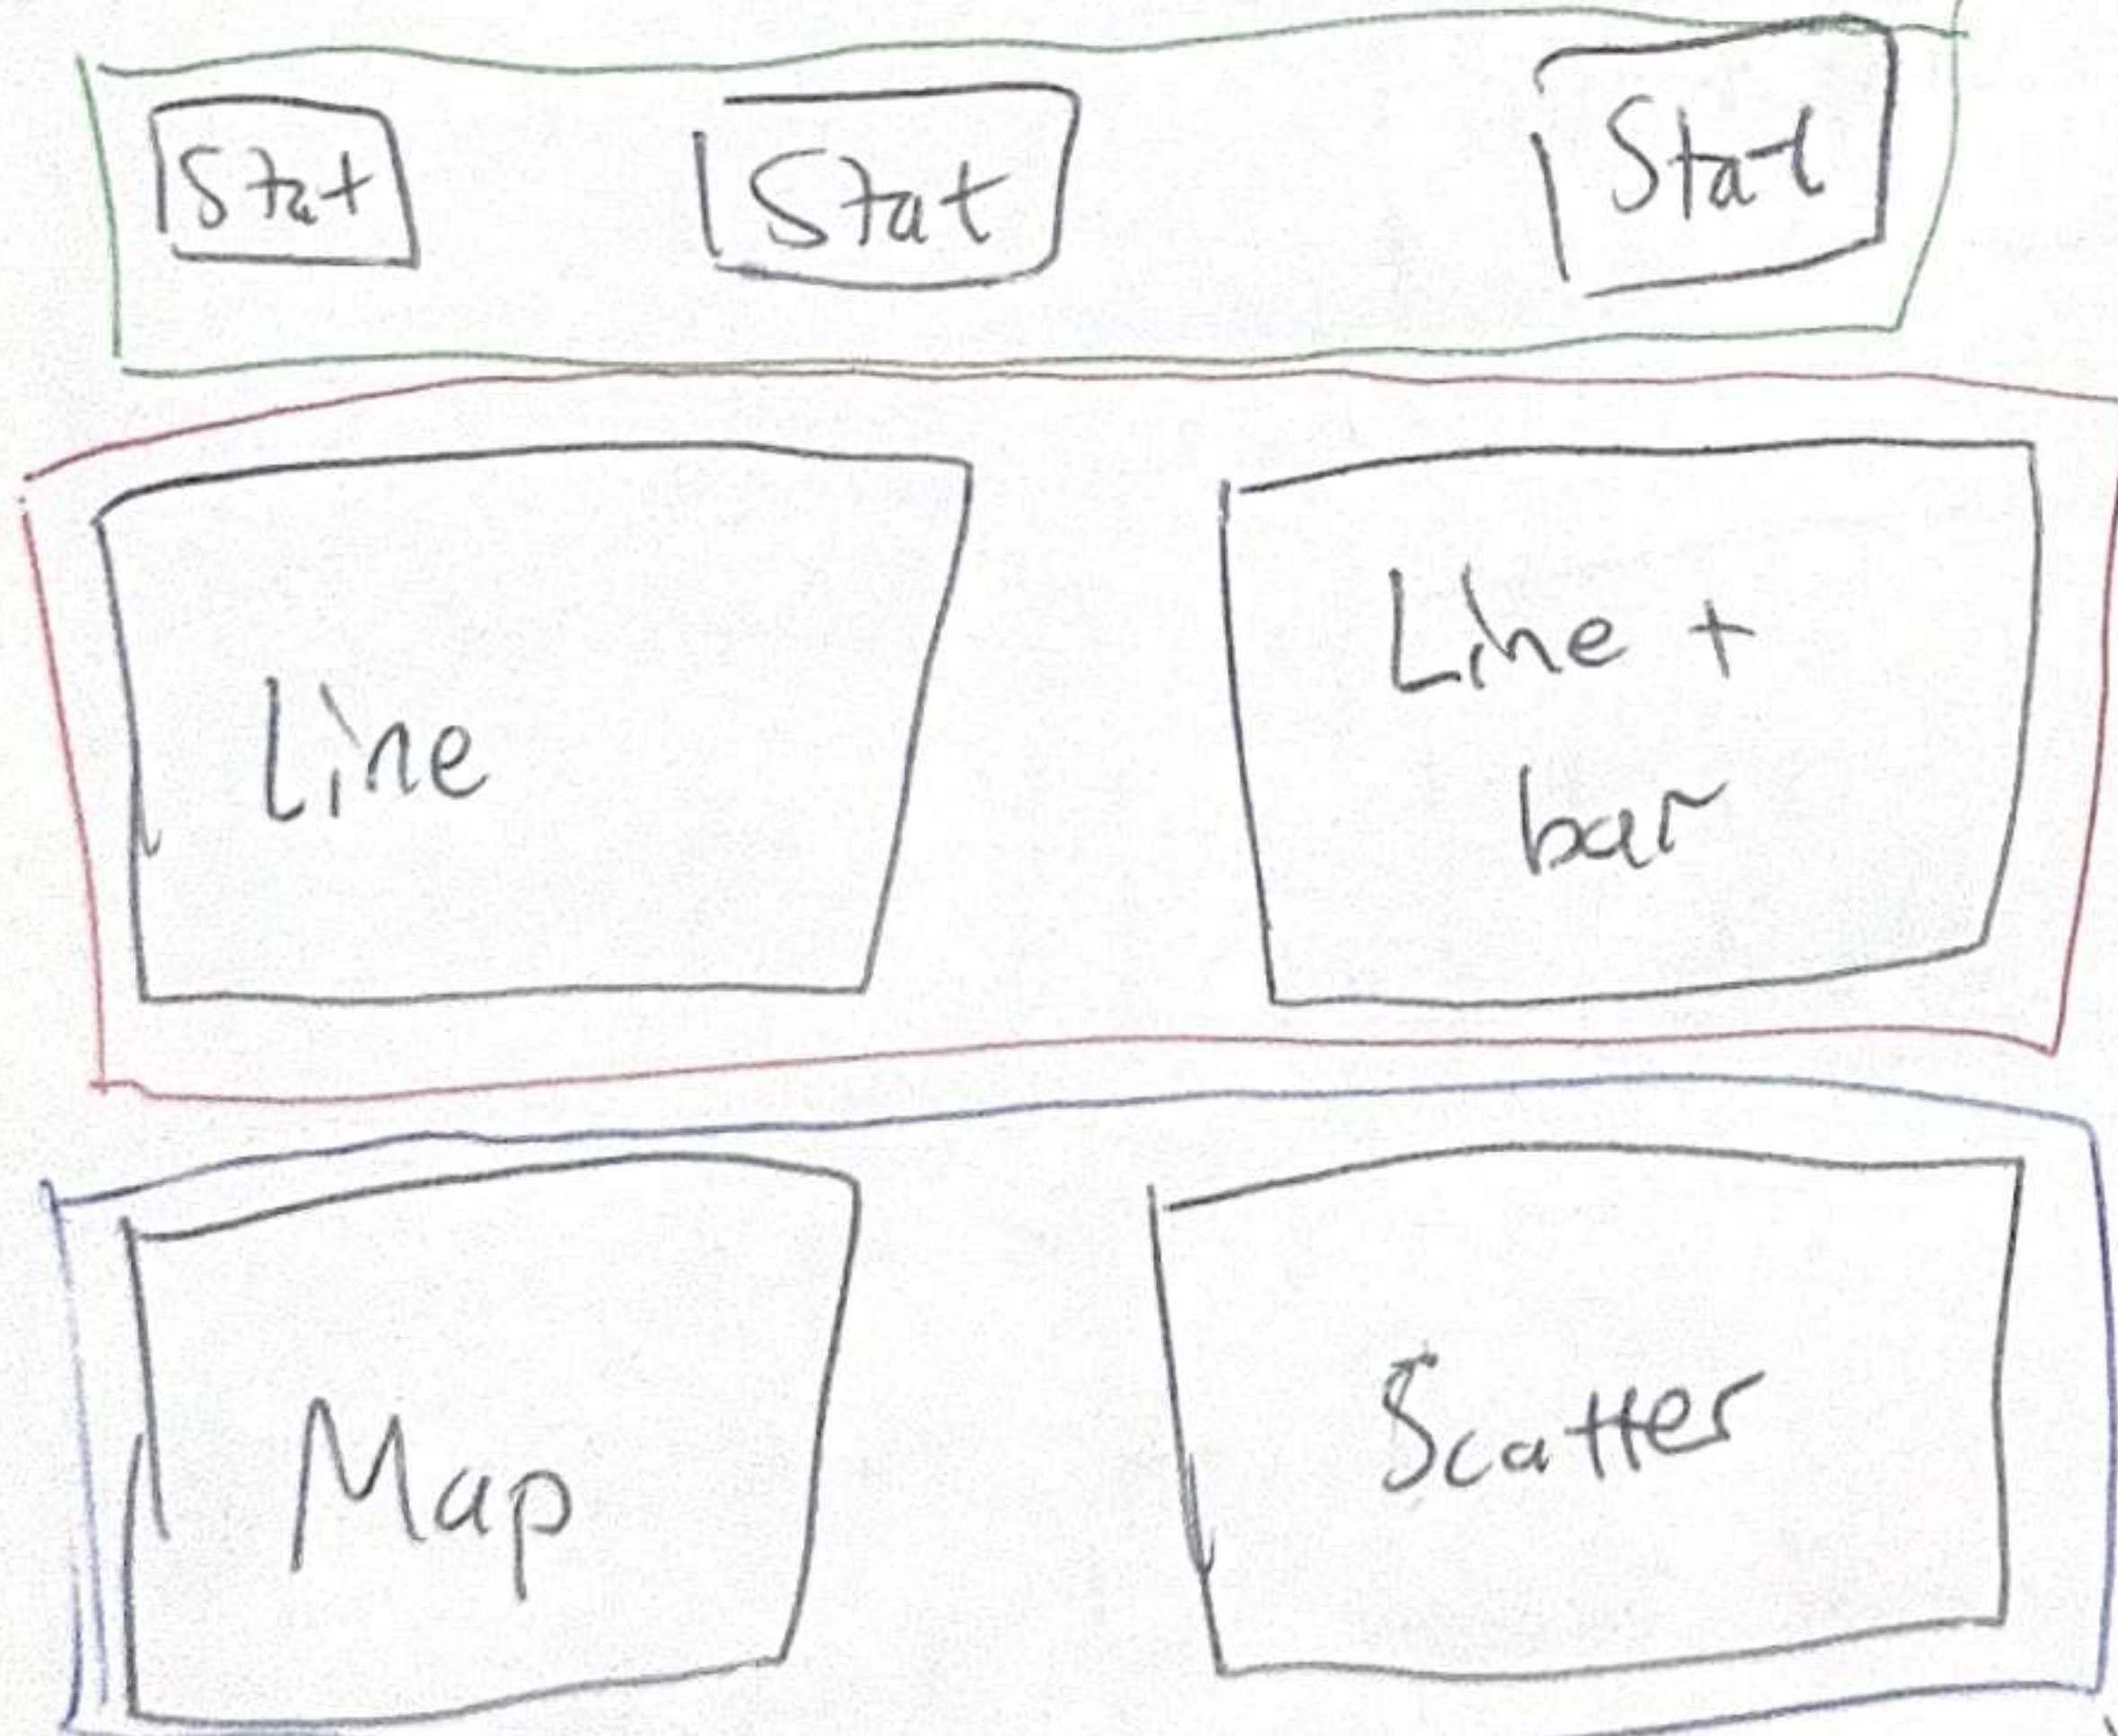

Australian Business Statistics

Parti / Focus

Focus: Understand overall picture then look more in depth into specifics.

Title

Look first - intro Look last - focus in depth
Look next - understand context.

Sheet 2

Title: Australian Business Statistics

Ft3179 SDS

Components / Operations

Line graph 1:

- Area filter, eg Melb CBD, decklands
- Type filter: type of business

Map:

- Location: zooms into specific location.
- Zoom: allows more zoom.

Scatterplot:

- Cuisine filter: select specific cuisines to visualise.

Pros + Cons

Pros:

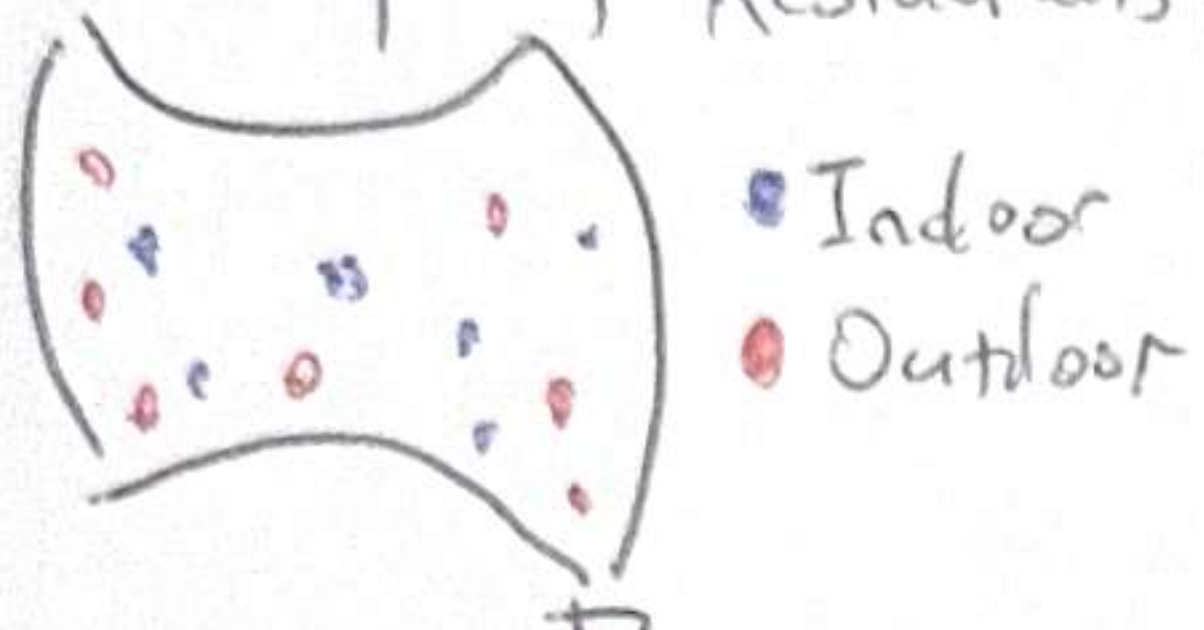

- contains a lot of interactive elements to provide more detailed information.
- The most important info is shown.

Cons:

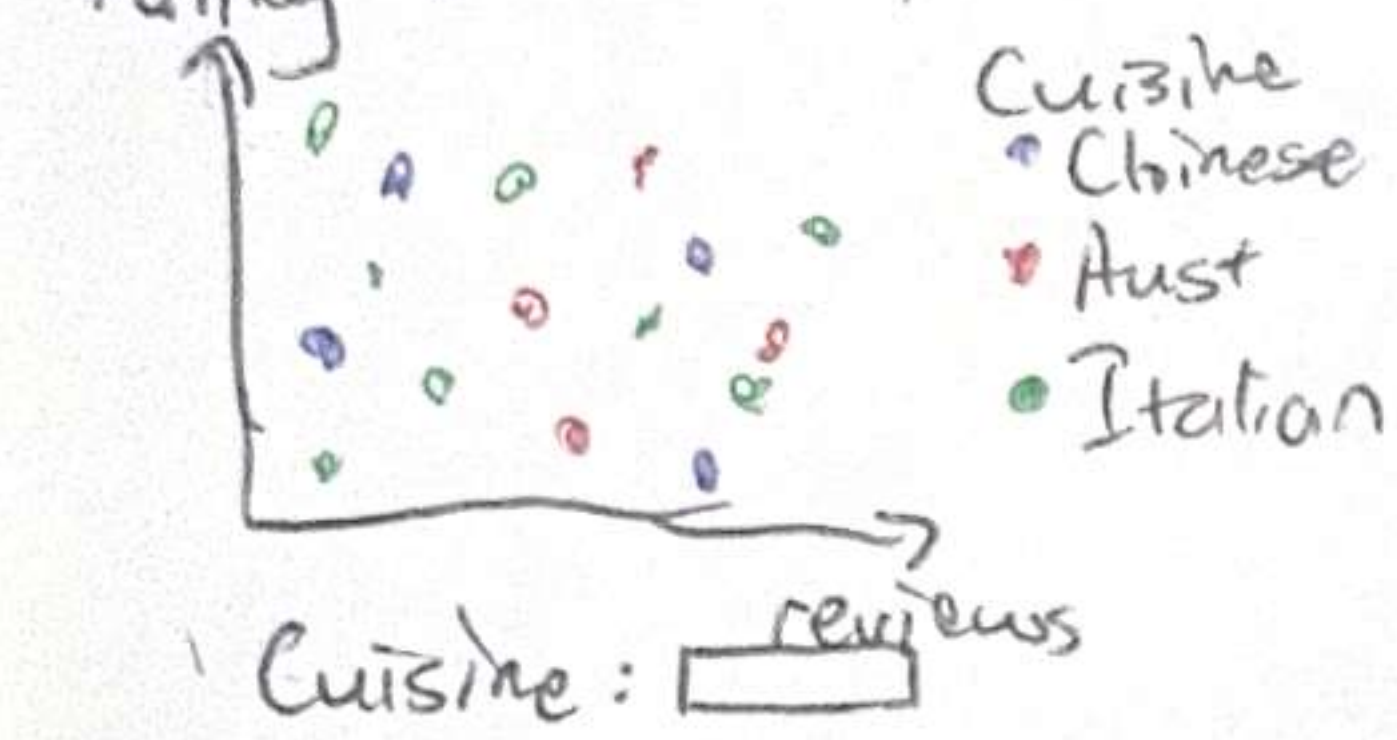

- No obvious focus point.
- May be hard to view intricate details due to device size limitations.

Sheet 3
Brian Wu
Title: Australian
Hospitality and Businesses
Fit 3179 5DS

Components / Operations
Map!

- Location dropdown
- Zoom bar

Scatterplot

- Cuisine dropdown

Line

- Businesses dropdown

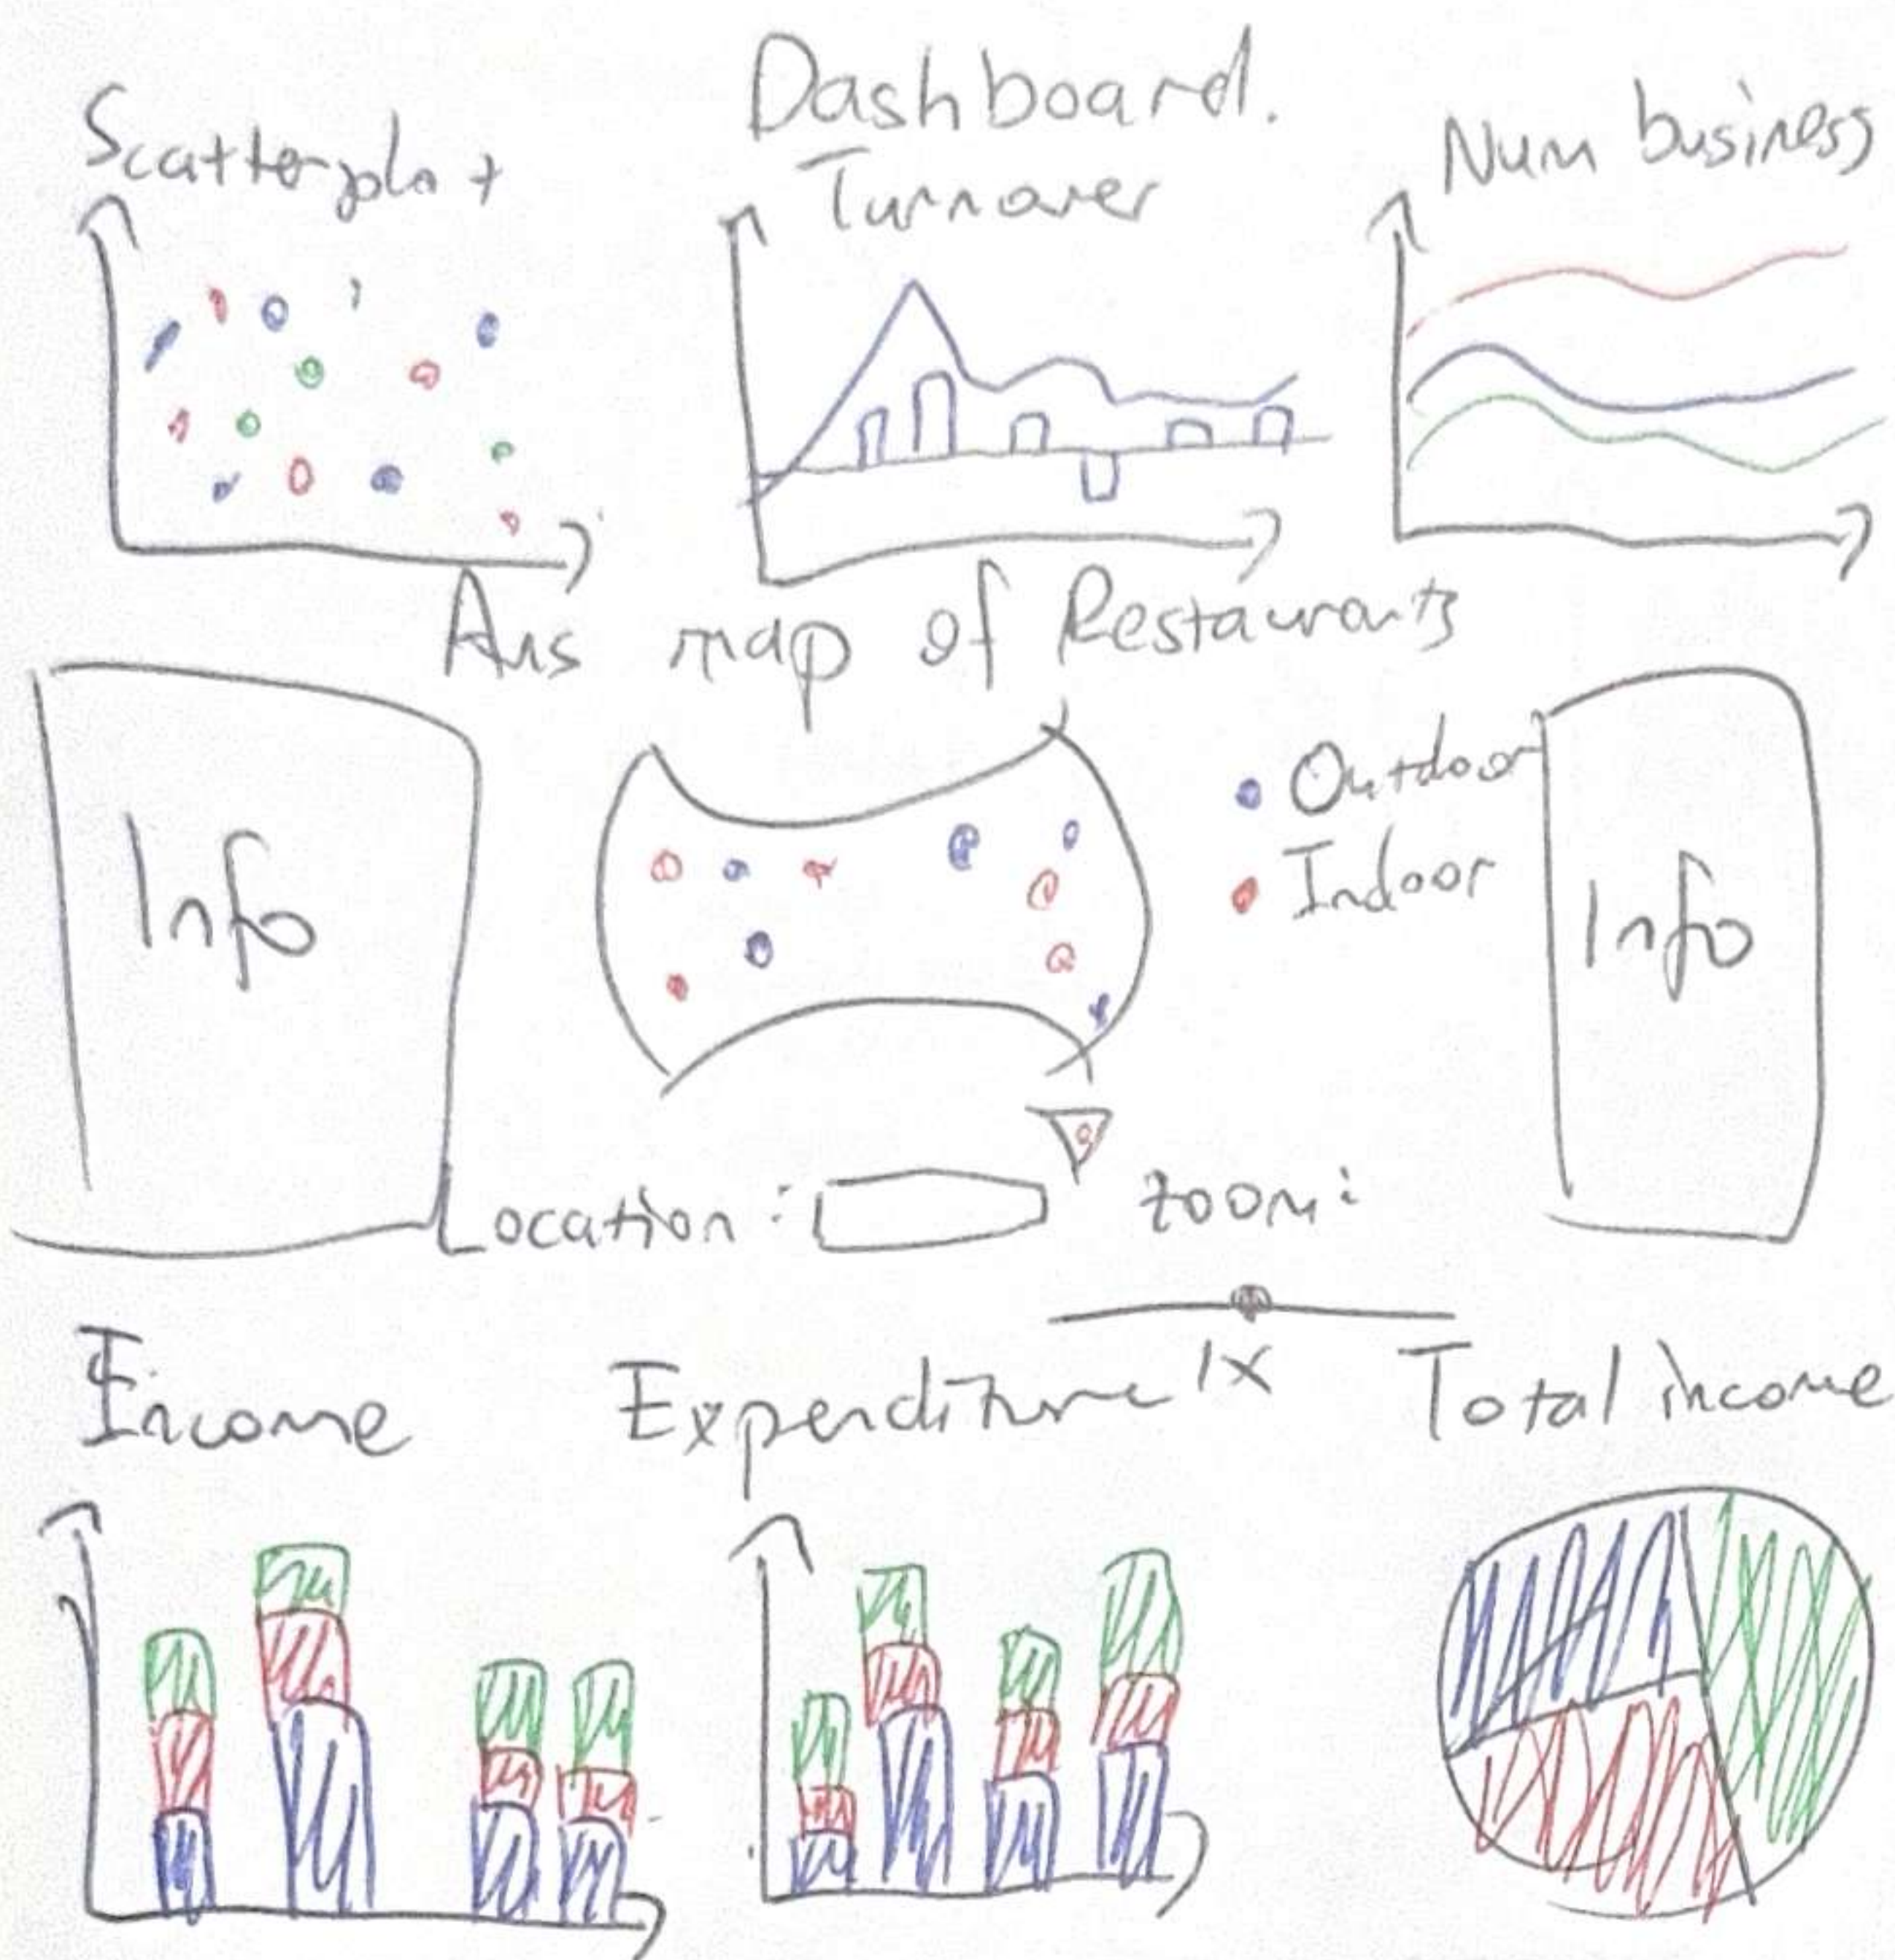

These are all filters on the data.

Pros + Cons

- Pros:
- Can easily view small data on diagrams
 - More room for text and insights.
- Cons:
- Very long page
 - May have empty space on sides of page.

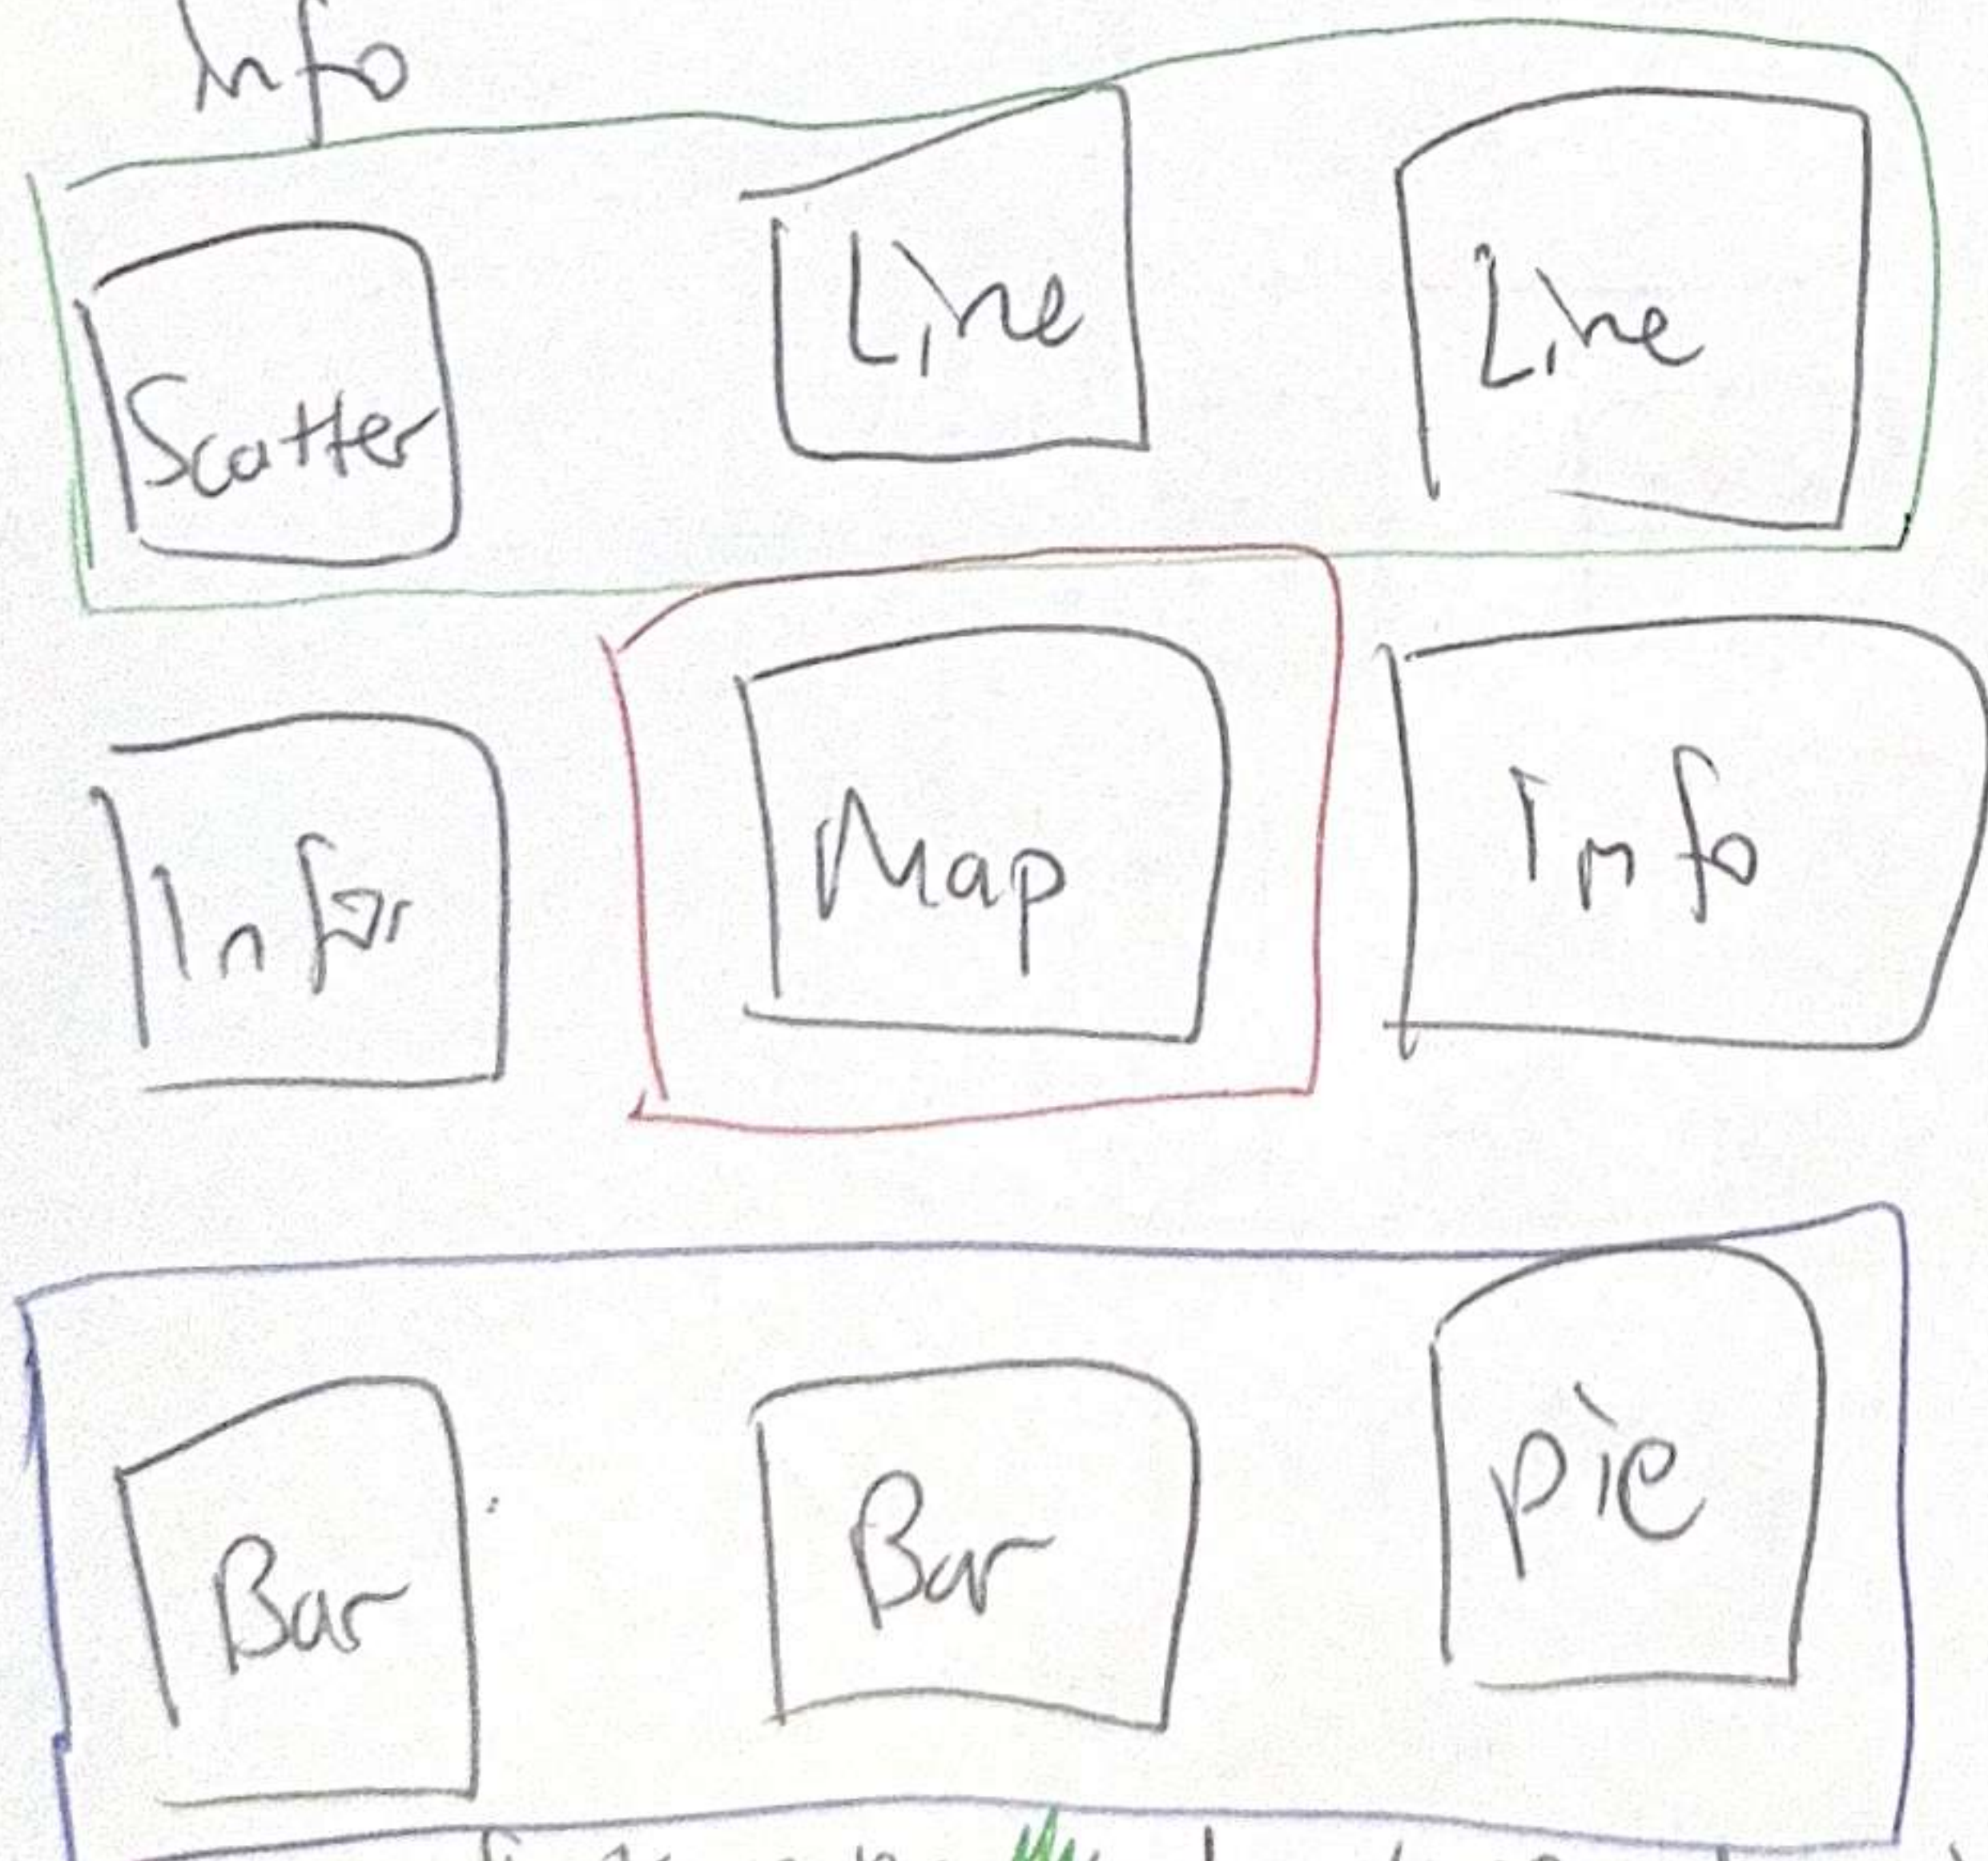

Big Picture / Layout

Australian Businesses

Part / Focus

Focus: Map is center of focus.
- can view surrounding for more info

Look first - center - Look second - main
Look last - Supplementary info - info

Sheet 4
